INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.

PCT/FR2004/002316

Box No. V	Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement		
1. Statement			
Novelty (N)	Claims	<u>1-14</u>	YES
	Claims	<u></u>	NO
Inventive step (IS)	Claims	<u>1-14</u>	YES
	Claims	<u></u>	NO
Industrial applicability (IA)	Claims	<u>1-14</u>	YES
	Claims	<u></u>	NO
2. Citations and explanations (Rule 70.7)			
1. In the present report, reference is made to the following document:			
D1: EP-A-1 013 567			
2. D1, which is considered to be the most relevant prior art, describes a bag consisting of two surfaces mutually connected around their entire periphery except for one longitudinal edge; the bag has an opening leading into said longitudinal edge; the two surfaces of the bag are welded together along two opposite side seams; at least one surface is provided, in the vicinity of said opening, with at least one elastic band connected to said surface by two linking areas so that the useful length at rest of said elastic band between the two linking areas corresponds to the spacing between the two linking areas on the bag and is less than the length of the longitudinal edge of said surface of the bag.			
The subject matter of claim 1 is therefore novel (PCT Article 33(2)).

Box No. V

Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability;
citations and explanations supporting such statement

3. The problem that the present invention is intended to solve can be considered to be that of improving such a bag.

The solution to this problem, as proposed in claim 1 of the present application, is considered to involve an inventive step (PCT Article 33(3)), because it is not found in the prior art and cannot be derived in an obvious manner therefrom.

4. The same argument applies, *mutatis mutandis*, to the subject matter of the corresponding independent claims 11 and 14, which are therefore novel and inventive.

5. Claims 2 to 10, 12 and 13 are dependent on claims 1 and 11, respectively, and thus also comply, as such, with the PCT requirements of novelty and inventive step.
